

PRIVATE LABEL TECHNOLOGY SOLUTIONS

Grow your profit and network with exclusive access to PeopleKeys' Private Label Technology Solutions

Connect PeopleKeys' proprietary technology with your existing corporate website, shopping cart, or other proprietary application to offer your network exclusive access to online DISC and other behavioral assessments. We offer patent-pending matching technology to our behavioral assessments and matching technology for whatever your own applications need. Our APIs have powered applications from hiring boards, teambuilding applications, and a host of other applications where a complete understanding of behavioral understanding is key.

Your benefits:

- **Easy integration** with your existing corporate website, shopping cart, or proprietary application without cost of development. We offer simple to use API connections to make this part of your solution seamless to the user.
- **Resell and administer PeopleKeys DISC** and other behavioral assessments, access results and view analytics directly from your own website.
- **Provide more benefits and value** to your network without a major investment; gain more membership to your network by offering a service not available by competitors
- **Grow your business and network** through passive income and online assessment sales
- **Exclusive partnership pricing** and assessment bundles; set your own product and service pricing

We have made our connections simple enough that it only takes an experienced web developer to implement, not a team of high-level programmers. In most cases, your website can be up and running with integration complete within 72 hours.

PeopleKeys has had success in behavioral analysis and unlocking human potential for over 35 years. Our team of developers and behavioral experts can assess your professional needs and build a customized solution that is tailored especially for you.
